

**Project Design**  
**Phase-I Proposed**  
**Solution**

Date	9 October 2022
Team ID	PNT2022TMID26684
Project Name	Smart Farmer - IoT Enabled Smart Farming Application
Maximum Marks	2 Marks

**Proposed Solution:**

S.No.	Parameter	Description
	Problem Statement (Problem to be solved)	To develop IoT-based agriculture system
	Idea / Solution description	<ul style="list-style-type: none"><li>• An IoT-based agriculture system helps the farmer monitor different parameters of his field like soil moisture, temperature, and humidity using some sensors.</li><li>• Farmers can monitor all the sensor parameters using a web or mobile application even if they are not near their field.</li></ul>
	Novelty / Uniqueness	<ul style="list-style-type: none"><li>• Easier recording and reporting</li><li>• Increased work efficiency</li><li>• Increase yield</li><li>• Easy of use</li></ul>
	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"><li>• Increased Quality of Production</li><li>• Remote Monitoring</li><li>• Help to reduce unnecessary wastage</li></ul>
	Business Model (Revenue Model)	<ul style="list-style-type: none"><li>• It's a more efficient method that saves electricity and water while also making frames more environmentally friendly.</li></ul>
	Scalability of the Solution	<ul style="list-style-type: none"><li>• Scalability in smart farming refers to the adaptability of a system to increase the capacity of yield</li></ul>
